

Preamble

To fulfill their mission to be environmental stewards, members of the American Association of Port Authorities (AAPA) and other ports worldwide have made significant progress toward, and recognize the need to continue to reduce the environmental impacts from port operations. This Environmental Management Handbook is intended to provide ports, their tenants, and other waterfront property owners/operators with practical advice and information on managing environmental issues. The document identifies critical environmental issues and presents cost-effective practices that may be used to reduce impacts.

This document is not intended, and does not constitute, professional, legal, or scientific advice to any user regarding the information contained herein or regarding any user's operations or environmental management practices. Use of the information presented herein in no way assures the fulfillment of a user's obligations under any local, state, or federal laws, rules or regulations. This document should not be relied upon as the sole source of information by any user for any purposes, including, but not limited to, evaluating its operations or environmental management practices. In no event shall the AAPA, Camp Dresser & McKee Inc. (CDM), or other contributors to this document be responsible or liable for any direct, indirect, consequential or special damages as a result of the use of this document or reliance on the information contained herein. An independent evaluation of the applicability of the information contained in this document, including obtaining advice of an attorney or other consultants as appropriate, with respect to such evaluation, should be conducted before use of this document.
