Port of River City: Introduction

“Port of River City” is a training concept developed by the American Association of Port Authorities (AAPA) through the SHARE initiative.

This presentation and all its materials are property of AAPA and may not be copied or used without the express permission of AAPA.

Any similarity to real places or individuals is purely coincidental.
Port of River City: Introduction

Overview:

• Each team will serve as the communications staff for the imaginary Port of River City.
• Teams will face a day of taxing events, which unfold rapidly, as a simulated crisis takes shape.
Port of River City: Introduction

Overview, continued:

- Those events, and their consequences, will come to you in the form of written inputs from your exercise workbook.
  - Each team must develop a way to receive, evaluate and react to these inputs.
- This is a timed, two-hour exercise. The official timekeeper will signal when to turn the page and receive each new input.
Port of River City: Introduction

Learning Objectives:

• Learn the roles port communicators play during a crisis and the pressures they face.
• Learn how they depend on other port officials for crucial information and guidance.
• Learn how seamless cooperation between the press office and other port professionals helps ports respond effectively to a crisis and resume normal activity.
Port of River City: Introduction

Learning Objectives, continued

• Discover/rediscover the wide range of audiences that must be considered in handling crisis communications.
• Learn first-hand the importance of being strategic, proactive and “on message.”
Port of River City: Introduction

Learning Objectives, continued:

- Learn the importance of team work and information flow during a crisis.
- Learn communications decision-making in absence of complete details.
- Learn to blend strategic and tactical elements of successful crisis communications.
Port of River City: Introduction

As a Participant:

• Your job is to determine how best to deal with the situation as it unfolds and fulfill your mission as the port’s communications team.
• Think of this as a real crisis – place yourself in the crisis frame of mind; be proactive and achieve goals.
Port of River City: Introduction

As a Participant, continued:

- The exercise will run until approximately 3:45 p.m. to be followed by a discussion of the exercise and crisis communications.
- Teams will have opportunities to assess their performance as well as the overall exercise.
Port of River City: Introduction

Rules of the Exercise:

• As in a real crisis, the EOC - Emergency Operations Center - will be the final authority.
  - Ben Zingman and Maureen Chan-Hefflin will act jointly as facilitators and serve as the Port Director and EOC/PIO, the primary point of contact for each team.
  - The EOC/PIO will have final decision authority.
  - All information that comes to you from the facilitators (as EOC/PIO or Port Director) is to be regarded as true and accurate.
Port of River City: Introduction

Rules of the Exercise, continued:

• You will have designated times to ask questions to the facilitator, but many questions either cannot or will not be answered, as in the real world.
  − Answers will be provided to all teams simultaneously.

• Questions for other port officials need to be directed to the facilitator as well.
Port of River City: Introduction

Crisis Plans:

• Assume the port has detailed crisis response plans as required by the Coast Guard and DHS.
• Assume the port has a **crisis communications plan** with:
  - Prepared media lists and other press information.
  - Background information about port and port businesses: jobs, companies, products, etc.
  - Contact information for emergency and management personnel from the port, stakeholders and emergency response organizations.
Port of River City: Introduction

Methodology:

- Teams should respond to the situation, act proactively, engage in communications or take other specific actions they determine necessary and appropriate.
- Teams make their own decisions about how to organize themselves and how to proceed in the drill.
  - Inputs from the workbook must be received and shared, without burdening one person; assignments may have to be divided to cope with conflicting demands.
Port of River City: Introduction

Methodology, continued:

• All teams begin (and end) at the same time.
• All teams receive the same inputs at the same time from the work book.
• A time keeper will direct teams when to turn the page to the next input.
Port of River City: Introduction

Inputs:

- Information will come to you in the form of:
  - News reports (actual breaking news stories).
  - Inquiries from journalists and other stakeholders.
  - Direct communications from the EOC/PIO and the Port Director and other port officials, including responses to questions.
Port of River City: Introduction

Responding to Inputs:

- Examine inputs for **new information** that advances the action:
  - Does the new info require a response or other activity by your team?
  - Can you anticipate additional inquiries or inputs?
Port of River City: Introduction

Responding to Inputs, continued:

• Partial Checklist:
  - Does a reporter need an answer right away?
  - How should requests for info be prioritized?
  - Did a news report contain a factual error or misstatement? Should it be corrected?
  - Do you need to contact the EOC/PIO, Director or other officials to obtain info or alert them to new situations?
Port of River City: Introduction

Responding to Inputs, continued:

• Teams must decide how to respond:
  - Reply, ignore or direct requests elsewhere.
  - Develop and distribute materials such as news releases, fact sheets.
  - Request action, support or new information from other port officials or external stakeholders.
  - Initiate briefings or news conferences.
  - And more!

• Together, these responses are the team’s “outputs.”
Port of River City: Introduction

Outputs:

• Teams will log all outputs (outbound activity) using log forms provided. Outputs may include:
  - Phone calls, e-mails or faxes whether responding to inquiries or seeking new information.
  - News releases and other written materials.
  - News activity (holding a briefing, for example).
  - Other actions and communications.
Port of River City: Introduction

Outputs:

• Record purpose of communication or action, to whom it was directed and key messages. No need to record full text.
• Logs will be reviewed during the post-drill discussion.
Port of River City: Introduction
Port of River City: Introduction

We will be talking about Port of River City today. River City is a large, natural deep-water port on the eastern coast of a nonspecific country. Its primary functions are container, automobile and coal shipping and receiving.
Port of River City: Introduction

There is cruise ship as well as recreational boat traffic in the port and surrounding waters.
Port of River City: Introduction

As with many port areas in the country, there is a large commercial and residential presence in and around the Port of River City.
Port of River City: Introduction

Both large scale and light industry are based on and around the waters of the port.
Port of River City: Introduction

Some of the prominent businesses of the port area are Big Farm Products...
Port of River City: Introduction

the oil company Petro Giant...
Port of River City: Introduction and the Acme chemical production company, which manufactures toxic gaseous chemicals.
Port of River City: Introduction

There are also numerous services on the waters, such as tugs, fire fighting equipment, the Coast Guard, and both city and port police.
Port of River City: Introduction

To summarize, the Port of River City is a large, thriving port that supports commercial, retail, industrial and residential activity as well as a successful tourism industry.
Port of River City: Introduction
Port of River City: Introduction

Geographic Highlights:

- Private Terminals: ABC Coal, Dockside Marine and Dockside Passenger
- Public Terminals: Long Point, Sandman
- Port Authority HQ: Trade Center
Port of River City: Introduction

Criteria for Post-Exercise Evaluation of Teams:

1. Did we perform well as a team?
2. Were we strategic?
3. Did we develop a plan?
4. Did we adjust to changing circumstances?
5. Did we anticipate situations proactively?
6. Did we follow through and meet deadlines?
7. Were we accurate?
8. Did we have a positive impact?
Port of River City: Introduction

Final Notes:

- All materials will be collected at the end of the exercise.
- Following the exercise, there will be a brief break and then a discussion of both the exercise and the lessons to take back to your ports.
